FOR IMMEDIATE RELEASE

New Weber 604 Slicing System increases presentation flexibility, throughput and hygienic operation for mid-volume processors.

Automatic, center loading, greater throughput and a wider variety of presentation styles are just three of the many performance enhancements designed to assist mid-volume processors using Weber's new 604 Slicing System.

Touch-screen controls provide rapid and convenient changeovers between nine standard presentations, including straight or interleaved stacks; shingles; pieces; shaved; folded; overlapped; and party tray ovals or rounds. The optional Weber Portion Designer creates limitless opportunity for imaginative presentations.

To maximize throughput, multiple products up to 60-inches in length may be loaded through a 14-inch wide throat that can be adjusted from 4.9 to 6.5-inches tall. Geometrically optimized circular blades, designed and manufactured by Weber, slice efficiently at speeds up to 600 RPM. Slice thickness is electronically adjustable from 0.5 mm to 50 mm with push-button ease.

Model 604 design innovations improve processor yields by combining the advantages of gripper feed control with the productivity of a continuous feed system. Extensive in-plant tests illustrate product give-away reduced to near zero.

A wide array of Weber options is available to customize the 604 to a variety of specific applications. A fully automatic infeeder, accurate checkweigher and the industry's most efficient interleaver, capable of two-lane stacked and shingled presentations, are among the options intended to help processors improve production speed and flexibility.

Weber manufactures a complete line of high-tech slicing machinery, as well as a wide variety of skinners, derinders and ice machines. Founded in 1981, Weber operates three manufacturing facilities in Germany, as well as the North American Technology Center and demonstration facility in Kansas City, MO.

The full array of new Weber machinery will be on display this October 24-27 at the World Wide Food Expo in Chicago's McCormick Place, Booth N2232 – North Hall.

Interested producers may contact the Weber, Inc sales office at **1-800-505-9591** or by email at usasales@weberslicer.com. Additional Model 604 details are available on the company's web site at www.weberslicer.com.
